

ÖHLINS Federbeine

Die Standardfederbeine von Seriemotorrädern stellen allenfalls einen Kompromiss dar, meist allerdings einen schlechten. Die Dämpfungsreserven reichen oft selbst für den forcierten Landstraßenbetrieb nicht aus. Auf der Rennstrecke sind die Feder Elemente dann hoffnungslos überfordert.

Die Folgen sind oft gefährlich. Neben schlechteren Rundenzeiten und getrübteten Fahrspaß kommt es nicht selten durch plötzlichen Gripverlust zu Sturz. "Mir ist einfach das Hinterrad weggegangen" ist dann oft zu hören.
